## Electronic Ignition Disclaimer

**WARNING:** Electronic Ignition Conversion Kits are polarity sensitive. Any attempt to start the tractor or vehicle with the polarity reversed will immediately destroy the unit. Make sure you have verified the proper polarity set-up (Positive Ground or Negative Ground) of your tractor or vehicle before purchasing an Electronic Ignition Conversion Kit. If you are unqualified to carry out this conversion please have a professional tractor or automotive repair shop make the change. Any negligent destruction of the Electronic Ignition Unit due to improper installation or electrical malfunctions will immediately void the warranty. Please contact Pertronix Performance Products for all queries about warranty returns for Pertronix products only.

As per Pertronix Performance Products, all electronic ignition kits should be used with **Low Ohm Suppression Spark Plug Ignition Wire**. Use of copper or any other material will damage the electronic components and void all warranty of the Pertronix Ignitor series electronic ignition kits.
